# The Six Month Countdown

BRIDAL HAIR TIPS

The dress has been chosen,  
your vision is coming together

...Now, let's talk hair!

When it comes to your wedding day, your hair is just as important as your dress or your shoes.

After all, you want to look your absolute best from head to toe!

Here are some top tips for achieving the perfect bridal hair:

# Let's Go...

1

## Start early

Don't wait until the last minute to decide on your wedding day hairstyle. Give yourself plenty of time to experiment with different styles and find the one that works best for you. We would generally recommend coming for your preview design session around 8-12 weeks before the big day!

2

## Consult with a Professional

Consider hiring a professional hairstylist to help you achieve your desired look. They can provide you with expert advice and guidance on what styles will work best for your hair type and face shape.

3

## Choose a style that compliments your dress

Your hairstyle should compliment your wedding dress, not compete with it. If you have a simple, elegant dress, consider a classic updo. If your dress is more intricate, opt for a simpler hairstyle.

4

## Consider the weather

If you're getting married in the summer or in a warm climate, you'll want to choose a hairstyle that can withstand the heat and humidity. Consider an updo or a half-up, half-down style to keep your hair off your neck.

5

## Don't forget about accessories

Whether it's a veil, a tiara, or a floral crown, accessories can add an extra special touch to your bridal hairstyle. Just make sure they compliment your overall look and don't overpower your hair.
